Student Club Event Ticketing & Budget Portal

Use-Case Flow Specification — Member 4 deliverable

USE CASE 4: View Approval Dashboard

Actor	Campus Admin, Club Lead (secondary: Faculty Coordinator, Finance Officer, Dean)
Priority	Medium
Related FRs	FR-004 (supporting: FR-001 approval routing, FR-002 proposal submission)
Focus	Reporting, filtering, role-based views

Preconditions

- User (Campus Admin or Club Lead) is authenticated with a valid session.
- System database has at least one active proposal record.
- Dashboard service and reporting service are operational.
- User has appropriate role permissions mapped in the RBAC table.

Postconditions

- Dashboard displays the real-time status of all proposals visible to the user's role.
- User can filter, sort and export reports for the records they are permitted to see.
- System logs the dashboard access and any export in the audit trail.
- No data modification occurs during the view — the use case is strictly read-only.

Main Success Scenario

1. Campus Admin logs in to the system.
2. Campus Admin clicks “Dashboard” in the navigation menu.
3. System loads the Dashboard page with four primary sections.
4. **Section A — Approval Pipeline:** a visual pipeline Pending Faculty → Pending Finance → Pending Dean → Approved, with a live count on each stage (Faculty 5, Finance 3, Dean 2, Approved 12); each count is clickable for drill-down.
5. **Section B — Proposals Table:** all proposals listed with the columns Proposal ID | Club Name | Event Name | Date | Budget | Status | Submitted On | Days Pending. Example row: “PROP-2026-1024 | Tech Club | AI Talk | 15-Sep | ₹50K | Pending Finance | 05-Sep | 10 days”. Status is colour-coded — red (rejected), yellow (pending), green (approved).
6. **Section C — Filters & Search:** the Admin filters by Status = “Pending Finance” and Date Range = “Last 7 Days”; the system refreshes the table and shows the 2 matching proposals.
7. **Section D — Reports & Export:** the Admin clicks “Generate Report” and the report builder opens (Report Type, Date Range, Format).
8. Admin selects Report Type = “Budget Allocation Report” and Format = “PDF”.
9. System generates the report showing total budget allocated ₹8,50,000 with a per-club and per-month breakdown.
10. Admin clicks “Download Report” and the file *Budget_Report_2026-09.pdf* is downloaded.
11. System logs: “Campus Admin viewed dashboard and exported report on [timestamp]”.

Alternate Flows

Alternate Flow A: Club Lead Views Their Own Proposals Only

- At Step 2, if the user role is “Club Lead”:
 - o Dashboard displays only the proposals submitted by that club (e.g. 2 active proposals).
 - o Each card shows the current stage and ageing, e.g. “Pending Finance for 8 days”.
 - o Timeline to event is shown against timeline to approval.
 - o A “Download Ticket” link appears for approved events.
 - o Club Lead cannot see other clubs' proposals; export is limited to their own records.
 - o Resume from Step 5 (table rendered on the filtered result set).

Alternate Flow B: Approver-Specific View

- At Step 2, if the user role is “Faculty Coordinator”:
 - o Dashboard shows “Pending Faculty Review” as the primary focus, count = 5.
 - o Table is filtered to proposals currently in the Faculty review stage.
 - o “Quick Approve” and “Quick Reject” buttons are available for fast-track decisions.
 - o System displays: “5 proposals waiting. Average review time: 3.2 days”.
 - o Resume from Step 6 (filters applied over the approver's queue).

Alternate Flow C: Real-Time Notifications

- While the Campus Admin has the dashboard open:
 - o A new proposal is submitted by a club.
 - o System pushes a toast notification: “New proposal submitted: PROP-2026-1025”.
 - o “Pending Faculty” count updates automatically from 5 → 6 without a page reload.
 - o Admin may click the notification to open the new proposal instantly.
 - o Resume from Step 5.

Alternate Flow D: Permission Denied

- At Step 2, if the user opens a proposal they are not authorised to view:
 - o System displays the error: “You do not have permission to view this proposal”.
 - o The row is greyed out or hidden from the table.
 - o User can click “Request Permission”.
 - o System e-mails the appropriate authority for approval; access is granted on approval.
 - o End Use Case.
